

U. S. & CANADA NURSERY EDITION

# Welcome to Fall Creek & Our 2017 Nursery Catalog!

**F**or nearly four decades, Fall Creek has been an industry leader in blueberry plants for the ornamental nursery and commercial fruit industries. This catalog represents our blueberry varieties and products for the ornamental nursery trade in the U.S. and Canada.

72 Cell Liner

We have the largest portfolio of varieties to choose from. Select from an array that ripen from early through to the late season so you and/or your retailers can sell consumers more than

one variety to ensure a full season of fresh berries. All of our blueberry plants are grown to the highest quality standards. Rest assured that our plants will deliver exceptional branching and vigor resulting in quick turn and exceptional finish quality.

Our nursery sales and customer service team, is ready to serve you with your blueberry needs. We know our products and varieties well and have experience in growing blueberry nursery stock and can be a great resource to help you maximize success. Thank you for putting your trust into Fall Creek.

- David Schlosberg, Director of Sales & Marketing, Fall Creek

**High Chill Varieties: Northern Highbush** (*Vaccinium corymbosum*)

Zones 3-9 / 800-1,000 Chill Hrs.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Northern Highbush <b>Aurora</b> <sup>L</sup> U.S. Plant Patent 15,185 ZONES: 4 - 8</p>	 <p>Very Late ▲</p>	 <p>L</p>	Fresh Tangy	5 - 6 ft. Rounded Upright	 <p>Deep Red, Wine</p>	
<p>Aurora can now stake its claim as the latest ripening Northern Highbush. Selected for its improved flavor and large berry size, Aurora can extend a gardener's bounty well into September. Aurora is the perfect variety for landscaping.</p>						
 <p>Northern Highbush <b>Bluecrop</b> ZONES: 4 - 8</p>	 <p>Mid ▲</p>	 <p>L</p>	Classic Sweet	4 - 6 ft. Upright Open	 <p>Red, Orange</p>	
<p>Bluecrop is considered the best all around variety for adaptability, long production period, high yield fruit and disease resistance. There are other varieties with better ornamental value but few perform better in the garden. Bluecrop is perhaps the most widely planted variety in the U.S.</p>						
 <p>Northern Highbush <b>Bluegold</b> ZONES: 4 - 8</p>	 <p>Mid ▲</p>	 <p>M-L</p>	Delicious Sweet	4 - 6 ft. Globe	 <p>Yellow</p>	
<p>Bluegold is compact and perfect for landscaping. Fall foliage and winter wood are a golden yellow, followed by bright-white blooms in the spring. The sky blue colored berries form large clusters that are easy to pick and are wonderful for baking.</p>						
 <p>Northern Highbush <b>Bluejay</b> ZONES: 4 - 8</p>	 <p>Early-Mid ▲</p>	 <p>M</p>	Delicately Sweet	6 - 7 ft. Upright	 <p>Orange, Yellow</p>	
<p>Bluejay grows rapidly and is relatively easy to establish and looks great in the landscape. Long, loose clusters of light blue fruit will hang on the bush for long periods without loss of quality, making it one of the best berries for freezing, pies, and even for canning. Light green colored leaves in summer precede bright yellow canes and branches in winter.</p>						
 <p>Northern Highbush <b>Blueray</b> ZONES: 3 - 8</p>	 <p>Mid ▲</p>	 <p>VL</p>	Classic Fresh	4 - 6 ft. Upright Open	 <p>Bright Red, Yellow</p>	
<p>A standby favorite and versatile variety, Blueray performs particularly well in areas with hot summers or very cold winters, and produces high-quality berries with outstanding dessert flavor. The stunning rosy pink flowers turn bright white when in full bloom.</p>						
 <p>Northern Highbush <b>Chandler</b> ZONES: 4 - 8</p>	 <p>Mid-Late ▲</p>	 <p>G</p>	Full Robust	5 - 7 ft. Slightly Spreading	 <p>Wine, Orange</p>	
<p>Chandler is currently the latest berry we have in our nursery program. The long ripening season will provide gardeners with a bounty of flavorful, fresh picked fruit for up to six weeks. Eaten by the handful or presented with a specialty dessert, Chandler will be a favorite.</p>						

<sup>L</sup> Licensed to Fall Creek. Royalties may apply. Please contact your Fall Creek representative for details.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Northern Highbush <b>Darrow</b> ZONES: 5 - 8</p>	 ▲ Late	 L	Juicy Robust	4 - 6 ft. Upright	 Orange, Red	
<p>Darrow boasts one of the largest berries of all cultivars, yielding fruit the size of a quarter. The berries are slightly flat and light blue with a memorable robust flavor, making them well worth every gardener's effort.</p>						
 <p>Northern Highbush <b>Draper</b> L U.S. Plant Patent 15,103 ZONES: 5 - 8</p>	 ▲ Mid	 L	Crisp Sweet	3 - 4 ft. Stocky	 Yellow	
<p>Draper has become one the most popular varieties for small u-pick and large farms alike. Now home gardeners can enjoy this mid-season ripening variety that yields large, crisp, light colored berries that are super easy and quick to pick!</p>						
 <p>Northern Highbush <b>Duke</b> ZONES: 4 - 8</p>	 ▲ Early	 L	Savory Sweet	4 - 6 ft. Stocky Upright	 Orange, Yellow	
<p>Duke is the most widely planted early ripening northern variety and for good reason. It is a heavy, consistent producer with an attractive, firm, light blue, high quality berry. Duke blooms late but ripens early which protects the blossoms from spring frosts. Branches may droop to the ground when laden with fruit, prompting many gardeners to use a simple trellis as support.</p>						
 <p>Northern Highbush <b>Earliblue</b> ZONES: 5 - 8</p>	 ▲ Very Early	 M-L	Sweet & Juicy	4 - 6 ft. Upright	 Red, Burgundy	
<p>First to ripen and early to bloom, this upright bush produces stout canes with bright red wood, while displaying large glossy green leaves in the summer and brilliant mixed red colors in the fall. Berries are light blue and large in size. Plant where blueberries are well suited and avoid frost pockets.</p>						
 <p>Northern Highbush <b>Elliott</b> ZONES: 4 - 8</p>	 ▲ Very Late	 M-L	Zesty	4 - 6 ft. Upright	 Red, Orange	
<p>With this variety, home gardeners can enjoy fresh berries through September. Bright burgundy colored wood accents the gray-green foliage and sky blue berries. The late bloom period that avoids most spring frosts and the typically heavy bud set warrants extra pruning, but the bountiful crops of larger fruit are worth the effort. The berry can be quite tangy unless picked fully ripe.</p>						
 <p>Northern Highbush <b>Jersey</b> ZONES: 4 - 8</p>	 ▲ Late	 M	Lush Sweet	6 - 8 ft. Upright	 Orange Flame	
<p>An heirloom classic and one of the most widely grown of all varieties, Jersey is a favorite for home gardeners who want an easy to grow bush. Jersey produces late season crops year after year. This bush tolerates a wide range of soil types, and the small to medium-sized, sweet tasting fruit is a favorite for baking.</p>						

L Licensed to Fall Creek. Royalties may apply. Please contact your Fall Creek representative for details.  
Outstanding Characteristic simply highlights one key attribute our team thinks stands out about that variety.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Northern Highbush <b>Legacy</b> ZONES: 5 - 9</p>	 <p>Late</p>	 <p>M-L</p>	Uniquely Robust	4 - 6 ft. Open Spreading	 <p>Crimson</p>	
<p>Legacy is a release from the USDA Blueberry Research Station in New Jersey. It keeps many of its leaves through mild winters, offering a very different look in the landscape. Foliage turns crimson in colder climates, but on the West Coast the leaves stay green with lighter fall hues. Legacy is both a vigorous grower and heavy producer, rating as one of the best flavored varieties in USDA trials.</p>						
 <p>Northern Highbush <b>Liberty</b>  U.S. Plant Patent 15,146 ZONES: 4 - 8</p>	 <p>Late</p>	 <p>M-L</p>	Balanced Robust Juicy	4 - 6 ft. Vigorous Upright	 <p>Red, Orange</p>	
<p>Liberty is a popular variety. Customers love their vigor and flavor. It produces firm, distinctly flavored, light colored berries that pick easily and ripen into late season time frames. Liberty is adaptable and grows vigorously.</p>						
 <p>Northern Highbush <b>Northland</b> ZONES: 3 - 8</p>	 <p>Early-Mid</p>	 <p>M</p>	Fresh Sweet	4 - 7 ft. Upright Spreading	 <p>Yellow, Orange</p>	
<p>Northland is the most cold-hardy Highbush variety. It is easy to grow and adaptable to many different soil types. This very productive variety has very high yields when mature. The berries are excellent for jams and baking because of their high sugar content. The bright yellow wood and compact shape makes Northland a good candidate for landscaping, especially when grouped with other compact varieties like Bluetta or Patriot.</p>						
 <p>Northern Highbush <b>Patriot</b> ZONES: 3 - 8</p>	 <p>Early</p>	 <p>L</p>	Delicately Sweet	3 - 5 ft. Open Spreading	 <p>Fiery Red, Yellow, Orange</p>	
<p>Patriot was selected for home gardeners who desire a cold-hardy variety that bears consistent crops. Patriot's low growing bush reflects its partial lowbush parentage. It is adaptable to many soil types and may perform better in wetter soils than many other varieties. Patriot makes an excellent container and landscape variety with its showy white blooms in the spring, dark green summer foliage, and fiery orange-red fall colors.</p>						
 <p>Northern Highbush <b>Reka</b> ZONES: 4 - 8</p>	 <p>Early</p>	 <p>M-L</p>	Excellent Rich Flavor	4 - 6 ft. Upright Vigorous	 <p>Red, Burgundy</p>	
<p>Reka was selected and developed in New Zealand. It is vigorous, fast growing, and adapts well to a wide range of northern climates and soil types. Gardeners will marvel at Reka's bountiful yields of early ripening, medium-sized, exceptional tasting berries. Burgundy red fall color is an added landscape bonus!</p>						
 <p>Northern Highbush <b>Spartan</b> ZONES: 5 - 8</p>	 <p>Early</p>	 <p>VL</p>	Robust & Fruity	4 - 6 ft. Upright	 <p>Yellow, Orange</p>	
<p>Spartan is one of the most attractive, easy-to-pick and best flavored blueberries, making it a favorite at farm market stands and with home gardeners. Spartan can be particular about soil types, requiring a site with light, well drained soils and abundant organic matter.</p>

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Northern Highbush <b>Toro</b> ZONES: 4 - 8</p>	 <p>▲ Mid</p>	 <p>L</p>	Mildly Sweet	4 - 6 ft. Stocky Upright	 <p>Crimson Red, Yellow</p>	
<p>Toro continues to amaze us with its easy to pick berries that hang like grapes from the stocky bush. While not as fast a grower as some of the other varieties, Toro has outstanding ornamental qualities. The flowers turn from hot pink to bright white and contrast nicely with the bronze colored spring foliage. Deep green summer foliage turns to the brightest of reds in the fall.</p>						

**Low Chill Varieties: Southern Highbush** (*Vaccinium corymbosum*)

Zones 5-10/150-800 Chill Hrs.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Southern Highbush <b>Emerald</b> <sup>L</sup> U.S. Plant Patent 12,165 ZONES: 8 - 10</p>	 <p>▲ Mid</p>	 <p>VL</p>	Mildly Sweet	5 - 6 ft. Rounded Spreading	 <p>Green</p>	
<p>Emerald yields abundant crops of the largest Southern Highbush berries with a mild, sweet flavor. Its rounded, spreading bush habit make it a great landscape plant. Dependable in southern climates with a <b>low chill requirement of 250 hours</b>.</p>						
 <p>Southern Highbush <b>Jewel</b> <sup>L</sup> U.S. Plant Patent 11,807 ZONES: 8 - 10</p>	 <p>▲ Early-Mid</p>	 <p>L-VL</p>	Tangy	6 - 8 ft. Upright	 <p>Green</p>	
<p>Jewel has become one of the leading varieties in California due to its adaptability, exceptional growth, high yields, and large tangy fruit. Jewel is excellent for warmer regions due to its <b>low chill requirement of 200 chill hours</b> and makes a most excellent landscape plant. Plant with other midseason varieties for best pollination.</p>						
 <p>Southern Highbush <b>Jubilee</b> ZONES: 5 - 9</p>	 <p>▲ Mid</p>	 <p>M</p>	Fresh Sweet	5 - 6 ft. Upright	 <p>Yellow - Wine</p>	
<p>Jubilee was developed in Mississippi where growing conditions can be tough. It has distinguished itself by performing well in heavier soils through summer heat and sudden winter cold. We especially like the taste of these easy picking, bountiful crops of sky blue berries that grow in large clusters and ripen over two weeks. Jubilee is recommended throughout the South and California in areas that receive <b>at least 500 chilling hours</b>.</p>						
 <p>Southern Highbush <b>Misty</b> ZONES: 5 - 10</p>	 <p>▲ Early</p>	 <p>M-L</p>	Sweet Spicy	4 - 6 ft. Upright Spreading	 <p>Blue Green, Burgundy</p>	
<p>Misty is one of the most attractive, vigorous and high yielding Southern Highbush varieties. The bright blue-green foliage provides a perfect contrast to the pink and white spring flowers and sky blue summer fruit. Yields best when planted with other varieties. <b>Chilling needs are very low at 300 hours</b>, but don't hesitate to offer it all the way to Seattle with other varieties in the landscape.</p>						

<sup>L</sup> Licensed to Fall Creek. Royalties may apply. Please contact your Fall Creek representative for details.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Southern Highbush <b>Oneal</b> ZONES: 5 - 9</p>	 <p>Very Early</p>	 <p>M-L</p>	Juicy Sweet	4 - 6 ft. Upright Spreading	 <p>Orange, Wine</p>	
<p>Oneal is considered by some to have the best flavor of all the Southern Highbush blueberries. Summer foliage is an attractive gray-green accented with red stems and branches. The correct soil pH is important and should be 4.5-5.5 for success with this variety. Oneal has a <b>chilling requirement of 500-600 hours</b>.</p>						
 <p>Southern Highbush <b>Southmoon</b> <sup>L</sup> U.S. Plant Patent 9,834 ZONES: 6 - 9</p>	 <p>Mid-Late</p>	 <p>L</p>	Complex Robust	5 - 6 ft. Upright Vigorous	 <p>Green</p>	
<p>Southmoon is recommended if your customers are asking for exceptional berries. It does especially well in lighter, sandy soils with generous additions of organic matter. This Florida native is performing well in California where <b>chilling hours reach 500</b>. We believe that it will become a favorite for southern gardeners.</p>						
 <p>Southern Highbush <b>Star</b> <sup>L</sup> U.S. Plant Patent 10,675 ZONES: 8 - 10</p>	 <p>Early</p>	 <p>L</p>	Sweet	6 - 7 ft. Upright	 <p>Yellow</p>	
<p>Star has been a valuable contributor to the growth of the commercial blueberry industry in southern regions for good reason. From a strong, upright growing plant, large berries with pleasantly sweet flavor can now compliment early season bounty in home gardens. Star has a <b>chilling requirement of 400 hours</b>.</p>						
 <p>Southern Highbush <b>Sunshine Blue</b> ZONES: 5 - 10</p>	 <p>Mid-Late</p>	 <p>M</p>	Rich Sweet	3 ft. Upright Compact	 <p>Blue Green, Burgundy</p>	
<p>For gardens from San Diego to Seattle, Sunshine Blue has it all. This semi-dwarf, versatile evergreen blueberry features showy hot pink flowers that fade to white in spring, yielding large crops of delicious berries. Sunshine Blue tolerates higher pH soils better than many other blueberries and it is self-pollinizing. The <b>low chilling requirement of 150 hours</b> makes it suitable for Southern California, but we find it is surprisingly cold-hardy and a wonderful addition to our patios and gardens here in the Pacific Northwest. Excellent for patio pots.</p>						

<sup>L</sup> Licensed to Fall Creek. Royalties may apply. Please contact your regional Fall Creek representative for details.  
**Outstanding Characteristic** simply highlights one key attribute our team thinks stands out about that variety.

**High Chill: Half-High Blueberries** (*Vaccinium corymbosum* x *V. angustifolium*)

Zones 3-7 / 1,000-1,200 Chill Hrs.

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Half-High Blueberries <b>Chippewa</b> ZONES: 3 - 8</p>	 ▲ Mid		Smoothly Sweet	3 - 4 ft. Compact Upright	 Red	
<p>Chippewa is a variety developed in Minnesota. The bush is slightly larger than Polaris and more upright than Northblue. Berries are sky blue and the largest of all Half-High varieties. Chippewa is excellent as a patio plant.</p>						
 <p>Half-High Blueberries <b>Northblue</b> ZONES: 3 - 8</p>	 ▲ Mid		Juicy Wild	3 - 4 ft. Upright Open	 Red, Burgundy	
<p>Northblue is a great landscape plant and proven producer of quality fruit in cold climates. The fruit has a "wild" taste that makes it excellent for baking or fresh eating. Northblue has survived winter temperatures to minus 35°F, although production is maximized when snow protection is adequate. Recommended for those desiring a higher yielding, cold-hardy variety.</p>						
 <p>Half-High Blueberries <b>Northcountry</b> ZONES: 3 - 8</p>	 ▲ Early-Mid		Classic Wild	1.5 - 2 ft. Compact Spreading	 Red, Scarlet	
<p>Northcountry grows slightly larger than Northsky, reaching 3' in diameter. It displays compact bush characteristics similar to Northsky, but is more vigorous and adaptable in less than optimum soil types. With its dark green summer foliage and scarlet fall color, Northcountry is one of the best varieties for patio pots in the edible landscape.</p>						
 <p>Half-High Blueberries <b>Northsky</b> ZONES: 3 - 8</p>	 ▲ Mid		Fresh Wild	1 - 1.5 ft. Compact Mound	 Red, Burgundy	
<p>Northsky is the most cold-hardy of all blueberries and can survive extreme winter conditions. Even in warmer areas, Northsky has been quite popular as a wonderful addition to the landscape, being particularly well-suited for container growing, borders or group plantings. The bush grows 2' - 3' wide and begins spring completely covered in snow white blooms. The foliage is dense, with small glossy green leaves in summer.</p>						
 <p>Half-High Blueberries <b>Polaris</b> ZONES: 3 - 8</p>	 ▲ Early		Delicate Sweet	3 - 4 ft. Compact Upright	 Red	
<p>Polaris, a variety developed in Minnesota, is recommended where a cold-hardy, early ripening companion to Northblue or Chippewa is desired. The berries are aromatic and very sweet. For best pollination and fruit set, plant Polaris alongside other cold hardy varieties.</p>

**High Chill: Wild Lowbush Blueberries** (*Vaccinium angustifolium* sp.)

Zones 3-7 / 1,000-1,200 Chill Hrs.

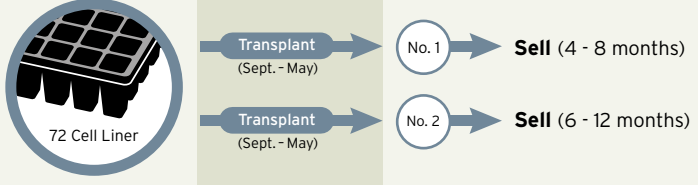

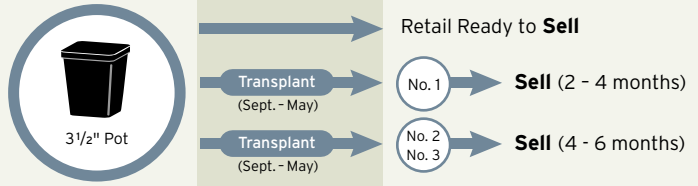

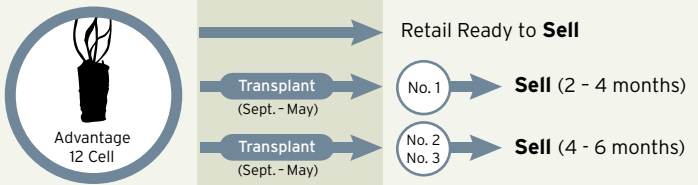

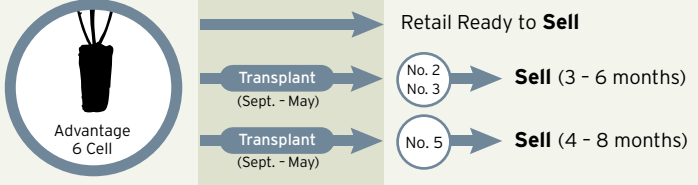

Variety	FRUIT			BUSH HABIT		Outstanding Characteristic
	Season	Size	Flavor	Mature Size & Shape	Fall Color	
 <p>Wild Lowbush Blueberry <b>Brunswick</b> ZONES: 3 - 8</p>	 <p>▲ Early</p>		Wild	1½ – 2 ft. Low to Ground	 <p>Red, Orange</p>	
<p><i>V. angustifolium</i> 'Brunswick'. Originally from Nova Scotia, we noticed Brunswick growing vigorously right here in Oregon, in a Willamette Valley trial plot. Brunswick forms a dense ground cover 1½' – 2' high. The green glossy leaves are a perfect backdrop to the sky blue, pea sized fruit. Brunswick scores high style points with amazing red fall colors.</p>						
 <p>Wild Lowbush Blueberry <b>Burgundy</b> ZONES: 3 - 8</p>	 <p>▲ Early</p>		Classic Wild	1 – 2 ft. Spreading Low to Ground	 <p>Burgundy</p>	
<p><i>V. angustifolium</i> 'Burgundy'. A standout selection from Maine, Burgundy has small but distinctive foliage: bronzy colored new growth in spring, delicate gray-green leaves in summer, and deep burgundy fall colors. The berries are the size of small peas, light blue, and are presented for easy picking around the outside of each compact plant. Growth takes place as underground stems spread. Mature size is about 3' wide by 1' – 2' tall and perfect in a patio pot.</p>						
 <p>Vaccinium Specialty <b>Top Hat</b> ZONES: 3 - 8</p>	 <p>▲ Mid</p>		Wild	1 – 2 ft. Globe	 <p>Yellow, Orange</p>	
<p><i>V. corymbosum</i> x <i>V. angustifolium</i>. Top Hat is a perfect name for this dwarf cultivar as it grows 1' – 2' high and wide. Top Hat is the result of crossing a short stature Highbush with a compact, small Lowbush Blueberry. Plentiful white blooms in spring give way to attractive light blueberries that are pea sized and larger. Top Hat is perfect for defined border plantings or growing in patio containers. It also makes an excellent candidate for a bonsai project.</p>						
 <p>Evergreen Huckleberry <b>Native Star</b> ZONES: 5 - 8</p>	 <p>▲ Late</p>		Wild Tart	6 ft. Upright Compact	 <p>Green</p>	
<p><i>Vaccinium ovatum</i>. We have selected this clone from huckleberry populations with superior landscape and fruiting characteristics. Year round deep green, glossy foliage, late summer dark burgundy fruit and upright compact growth to 6' make our Native Star Huckleberry an excellent choice for mass plantings or as specimen shrubs in full sun to dense shade.</p>						
 <p>Low Chill Rabbiteye <b>Pink Lemonade</b> ZONES: 4 - 8</p>	 <p>▲ Mid-Late</p>		Sweet Firm	4 – 6 ft. Vigorous Upright	 <p>Orange, Deep Red</p>	
<p><i>V. ashei</i> 'Pink Lemonade'. The Pink fruited blueberry! Pink Lemonade is a vigorous upright hybrid with sweet and firm, pink berries. Pink Lemonade has proven hardy as far north as New Jersey, yet will perform best in milder climates including areas where Rabbiteye cultivars can be grown. It is recommended that another Rabbiteye cultivar be planted with Pink Lemonade to ensure good cross-pollination.</p>						

Outstanding Characteristic simply highlights one key attribute our team thinks stands out about that variety.

# Product Descriptions

## Fall Creek's Products:

Our focus at Fall Creek is clear: to provide the finest quality, healthiest plants available to maximize your success. Our high health production program provides assurance that each plant meets our uncompromising quality standards which provides you with true-to-type, vigorous, healthy, and productive plants that your customers expect.

 <p><b>72 Cell Liner</b> 1½" x 3" Cell 72 ml. Media Volume 4"- 6"+ Sheared Height</p>	 <p><b>72 Cell Liner:</b> Fall Creek's premier one year liners are multi-caned and vigorous. These liners provide a well-balanced, extremely uniform crop with consistent quality.</p>
 <p><b>3½ Inch Pot</b> 3½" Sq. Pot 656 ml. Media Volume 10"+ Sheared Height</p>	 <p><b>3½ Inch Pot:</b> This container is an ideal starter size for retail sales or for shifting stock. These strong branched, vigorous plants are a great candidate for a quick turn to a No. 1 or No. 2 pot in one season.</p>
 <p><b>Advantage 12 Cell</b> 3" x 7" Cell 650 ml. Media Volume 10 Plants per Bundle</p>	 <p><b>Advantage 12 Cell:</b> Fall Creek's innovative alternative to traditional bareroot plants can provide 30-50% greater first season growth from the well rooted cell. Well suited for retail or shifting stock to No. 1, No. 2 or No. 3 pot. Packed and shipped "no pot" in bundles for efficiency and freight savings.</p>
